

Please do not take away the "Do not call list" in NJ. This program allows us to be protected from all of the annoying and possibly dangerous telemarketers and vendors that call all times of day or night. I have very young children and late evening/night phone calls disturb them as well as our entire family. I am sure that it also protects many elderly people who may receive fraudulent phone calls that take advantage of their trusting nature. Please continue to protect the public by keeping this program going. I am sure that it is VERY beneficial to MANY people who use it. Don't let the telemarketing companies and others have free reign to our privacy. Thank you!
